# Tutorial №5

**- Work example with a clipboard and effects -**

For an example we will create the primitive picture in the graphic Paint editor and we will copy it in a clipboard.

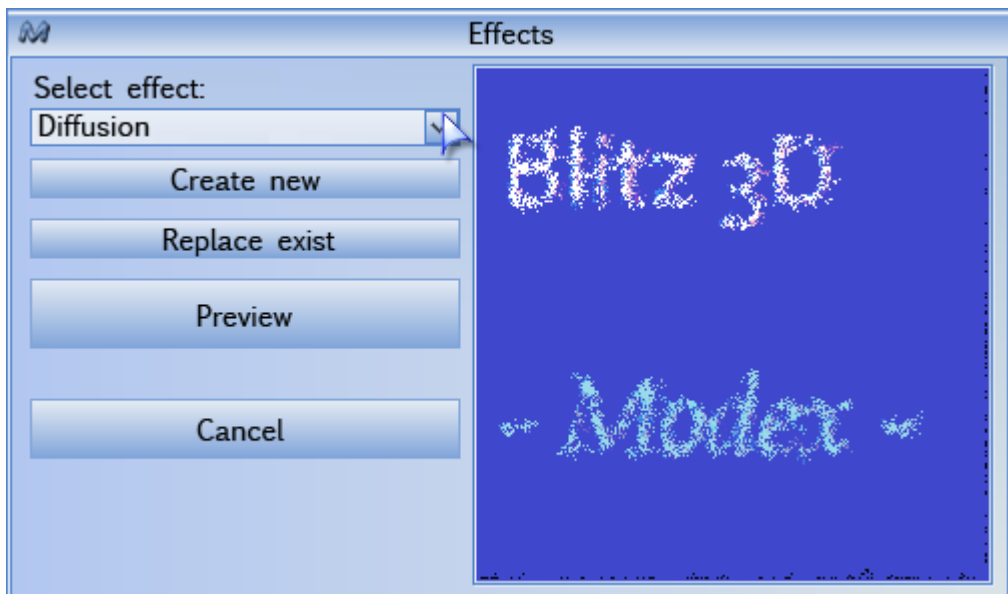

Further we load Modex, we come into base of textures and we press the button – Paste from buffer.

Texture already in base, but we will in addition apply to it effect
"diffusion", for this purpose we choose a texture
and we press the button – Effects.

The effect necessary to us is chosen from the dropping-out menu
and we press the button – Replace exist.
